

Seeking Women Recovered from Anorexia and/or Bulimia Nervosa!

UCSD Eating Disorders Treatment and Research Program is conducting imaging research studies with women recovered from Anorexia and/or Bulimia Nervosa. This research will help us examine the neurobiology of eating disorders.

We are seeking women in recovery who are:

- Between ages 18 & 45
- Maintaining a normal height and weight
- No serious medical problems
- No current medications (birth control OK)

You may receive compensation up to \$1250.00 for completion of the studies.

We may also be able to provide travel compensation to San Diego.
